

Advantages

Cost effective, indoor rack-mount power supplies.

Efficient units providing DC power for IBUC's.

Optimized for SNG-vehicle and mobile applications.

Power factor corrected power supply with universal 100-240 VAC input.

Terrasat's Indoor IBUC Power Supply, model PSUI-1248, runs on AC mains power and provides DC power to the IBUC through a multi-conductor 16 AWG cable. The units are packaged in rack-mountable chassis with internal cooling fans.

The Indoor Power Supplies provide 48 VDC power for Terrasat IBUC's through 125 W C-band, 125 W X-band, 80 W Ku-band, and 40 W Ka-band.

These efficient and cost effective power supplies are ideal for SNG vehicles, mobile terminals and other applications where a short cable run and mounting inside the vehicle, shelter or transit case is the preferred configuration.

Installed in a standard 19-inch rack, the Indoor Power Supplies occupy only one rack unit (1.75") of rack space and are powered from AC mains.

Simple, plug-and-play installation requires no on-site configuration.

The DC output connector is a circular MS-type compatible. An optional DC cable can be provided in customer-defined lengths with connectors installed for interconnection to Terrasat IBUC's.
